

## **ENVIRONMENTAL and QUALITY POLICY STATEMENT**

This model is to be able to demonstrate the availability for achieving the new goals in this area, for what we need the commitment of our suppliers and employees

The policy of INELCO Components S.L. is the starting point to stay and review the objectives of Quality and Environmental .

Our Commitment is being implemented to ensure that our customers' high quality standards are met with each transaction. INELCO is evaluated each day in each transaction more than 15 years ago. The quality and environmental certifications is only one step more in our continuous improvement process "Commitment to Quality Program" is continually improved as new standards are created and we develop new strategies to better serve our customers.

This policy provides the framework for the enterprise's commitment to Quality and the Environment as essential components to long term success. Through active leadership and management commitment we aim to continuously improve our Quality and Environmental process to the benefit of all our customers.

In order to create success in this area, INELCO requires participation and a shared commitment from all levels in achieving our goals. We believe that every employee, supplier and customer has a role to play in the promotion and development of our continual improvement process. Our manager shall ensure that this policy is applied throughout each business unit and periodically reviewed to ensure that content remains applicable and appropriate. Our approach involves Ensuring Quality and the Environment are core values for all undertakings: commercial, accounting, production and service customer. Building from a foundation of compliance with applicable legislation, national standards and documented company policies and procedures.

Commitment to comply with the requirements as outlined in ISO 9001 and 14001. Implementing measureable targets to promote continual improvement of the business relation with our customers. Developing a system to facilitate the growth of the organisation in a sustainable manner.

Each business unit maintains a proactive culture of visible leadership with transparent accountabilities. Positively contribute to the areas of Quality and the Environment to create a progressive and productive working environment. Conduct effective stakeholder engagement, communication and reporting through the provision of information which is timely, accurate, and relevant.

*This policy is communicated to all employee groups and made available to the public in [www.inelcocomponents.com](http://www.inelcocomponents.com)*
